## Accoya Twin Post Tee Sign

### Durable, stable and sustainable....

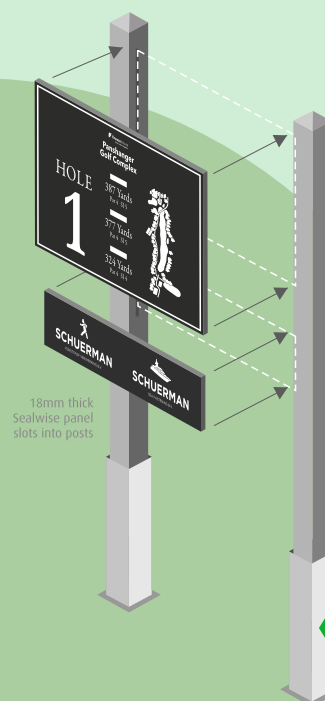

Ken White Signs are excited to be unveiling Accoya® wood to enhance what is already a hugely popular range of timber products.

Available with a Square, Peaked, Arched or Sunrise top, with a panel width of 600mm. Other sizes available on request.

Accoya® posts and cross rails with a flat aluminium panel. Graphics are produced using UV stabilised ink jet format.

This superb tee sign is very popular for use on large sponsorship packages.

- ✓ An alternative which offers all of the best characteristics of wood, exceeding even the best tropical hardwoods.
- ✓ Accoya® is modified right through the whole cross section, meaning that the ability of the wood to absorb water is hugely reduced.
- ✓ Finished with a high quality Teknos coating system, provides 10 to 12 years of maintenance free performance.

18mm thick Sealwise panel slots into posts

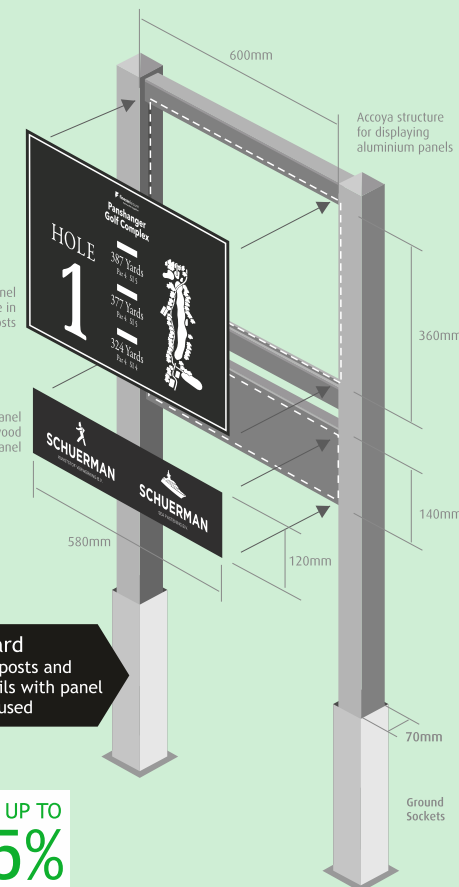

Aluminium main panel slots into groove in horizontal rail and posts

Aluminium sponsor panel screwed to hardwood backing panel

Standard Timber posts and cross rails with panel fully housed

Eco Style Panels simply sit between posts with no cross rails

## Hardwood Twin Post Tee Sign

### Our flagship timber product for 20 years....

Manufactured in quality hardwoods such as Iroko, a very stable and natural option for exploring your timber projects.

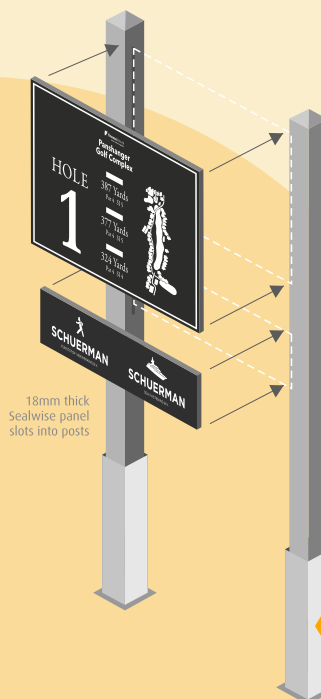

Available with a Square, Peaked, Arched or Sunrise top, with a panel width of 600mm. Other sizes available on request.

Hardwood posts and cross rails with a flat aluminium panel. Graphics are produced using UV stabilised ink jet format.

This superb tee sign is again very popular for use on large sponsorship packages.

Unlike the Accoya product, our hardwoods are coated with an Osmo oil system. Arguably a slightly more natural look than the Accoya/Teknos finish.

The timber will need re-coating regularly in order to keep the surface looking at its very best.

# Twin Posted Tee Signage Collection

## Recycled Plastic Twin Post Tee Sign

### Do your bit for our environment....

Recycled Plastic structure with all text and graphics produced in UV stabilised ink-jet format on aluminium.

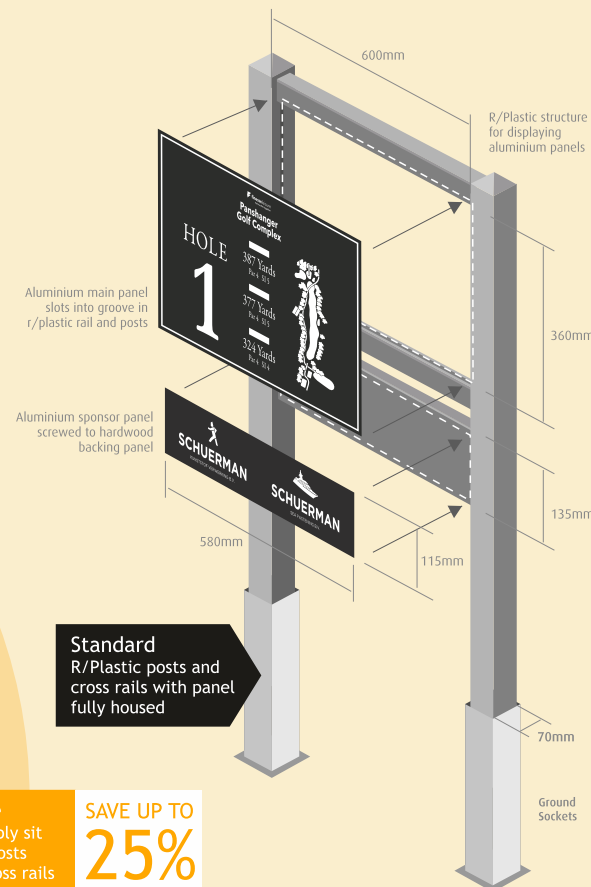

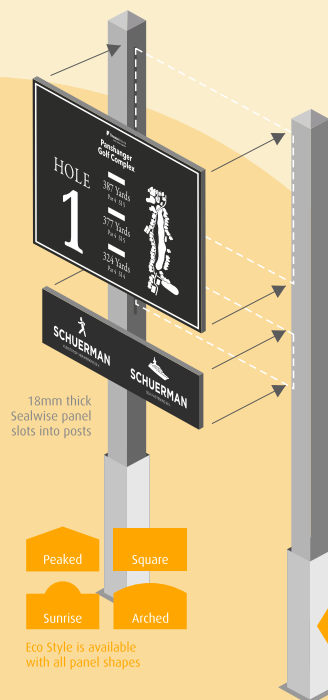

Available with a Square or Peaked top in the standard product. With a panel width of 600mm. Other sizes available on request.

Recycled Plastic posts and cross rails with a flat aluminium panel. Graphics are produced using UV stabilised ink jet format.

This superb tee sign is again very popular for use on large sponsorship packages.

Although mainly developed for its environmentally friendly appeal, this tee sign is also a very attractive option in its own right, projecting quality.

The product is very low-maintenance

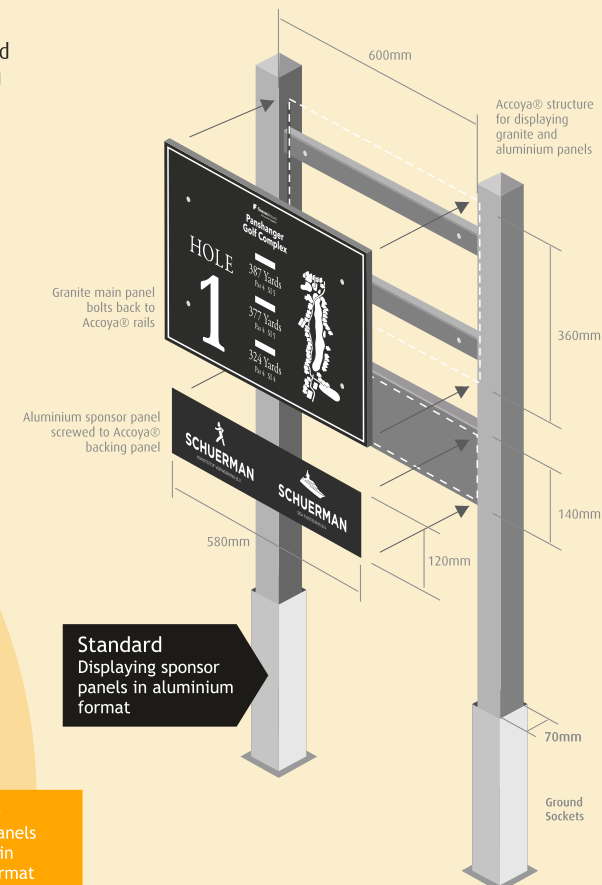

A high quality tee sign option.

This combined with the unrivalled natural stability and strength of the granite panelling.

## Noroko Twin Post Tee Sign

Noroko is a composite plastic/timber product, designed to look like real wood.

Noroko never needs treatment or painting. It is UV resistant and will withstand any weather or temperature change.

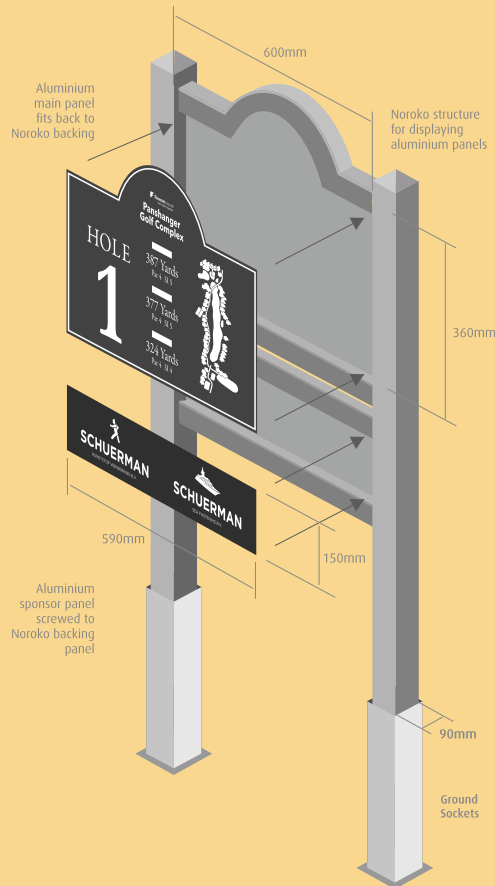

## Durable alternative to real wood...

Noroko® products are made to the finest quality, appearing no different to timber from a distance.

Available with a Peaked or Arched top, in a standard panel width of 600mm. Other sizes available on request.

Noroko® posts, cross rails and backing board, with a printed aluminium panel.

Another high quality tee sign option.

## Aluminium Slatz Twin Post Tee Sign

## Ken White Signs signature product...

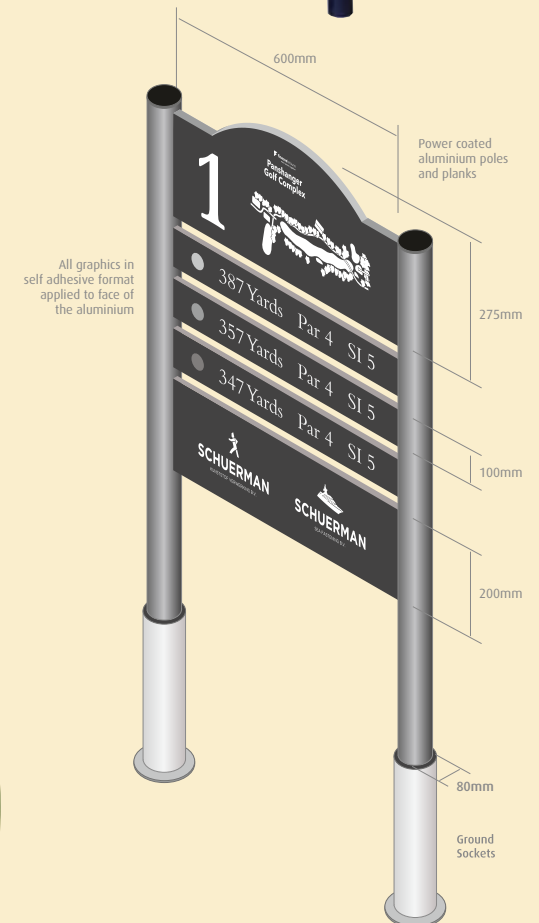

This product provided the corner stone for Ken White Signs entry into the golf market in 1999.

Available with a Square or Sunrise top, in a panel width of 600mm. Other sizes available on request.

Powder coated aluminium poles and sign planks with graphics produced in self adhesive vinyl.

A quality tee sign, with minimal maintenance required.

The overall performance of the finish on this superb product, is very similar to that of a car.

## The Totem Tee Sign Range

### Introducing the NEW Totem Tee Sign range

Ken White Signs have launched a new Totem style Golf Tee Signage range. Developing a unique product like no other currently in the marketplace.

There are two alternative core styles which you can choose from; The Kensington and The Clarence.

Within these two core styles, feel free to explore the full range of our possibilities for use of different material types and styles.
