

Oak Twin Post Sign

Naturally Crafted, Clearly Connected...

The Ken White Signs Twin Posted Oak Signage is a robust, natural wayfinding solution, designed to sit comfortably within landscaped and heritage environments.

The sign comprises a printed aluminium graphic panel mounted securely between two solid oak posts, creating a simple and understated appearance while providing excellent durability for external use. The oak is left with a natural finish to complement the surrounding landscape and will weather gracefully over time.

The Oak posts can be specified from FSC or PEFC certified responsibly managed sources

The Oak signage range lends itself to developing a coordinated family of signs throughout a leisure destination.

Oak Single Post

Naturally Crafted, Made to Guide...

COLOUR BAND

The Ken White Signs Oak Single Post combines the warmth and character of natural timber with a clean, contemporary panel.

Its compact footprint makes it particularly suited to visitor attractions, holiday parks, gardens, heritage destinations, nature reserves, hotels, resorts and other outdoor leisure environments.

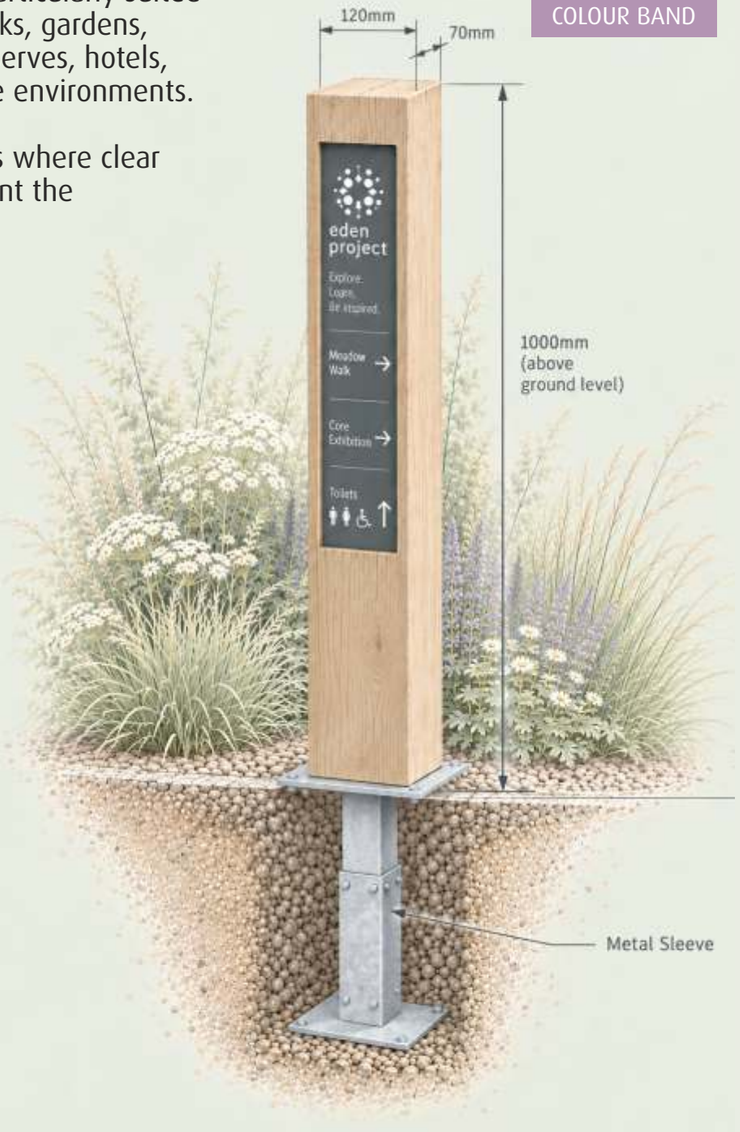

Designed for leisure destinations where clear way finding needs to complement the surrounding environment.

Manufactured from solid oak, the post provides a robust and attractive structure that will naturally mature and weather over time.

The Oak signage range lends itself to developing a coordinated family of signs throughout a leisure destination.

Oak Finger Post

Clear directions, naturally crafted...

The Ken White Signs Natural Oak Finger Post is a characterful wayfinding solution designed for locations where signage needs to be clear and functional while remaining sympathetic to its surroundings. Combining a solid natural oak post with slim powder-coated aluminium directional fingers creates a balance between traditional craftsmanship and contemporary sign manufacture.

This style of finger post works particularly well within destination, leisure, hospitality and heritage environments, where the quality and appearance of wayfinding contributes to the overall visitor experience.

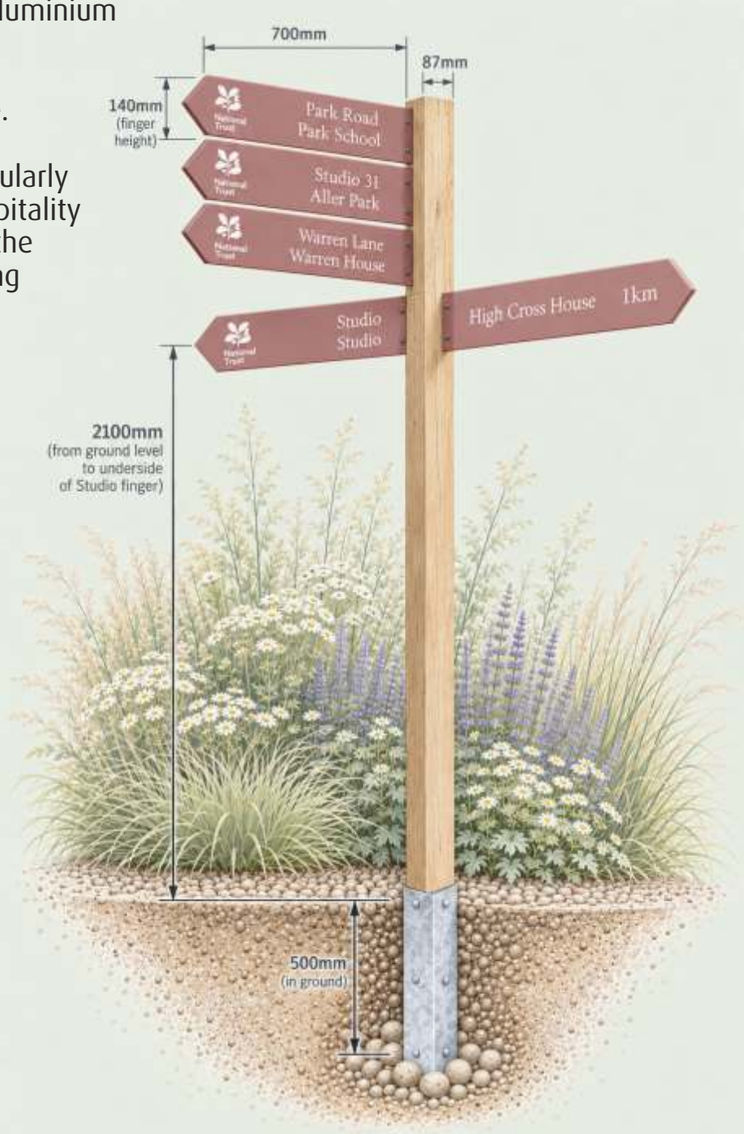

The Oak signage range lends itself to developing a coordinated family of signs throughout a leisure destination.
