isitwood Traditional Twin Post Sign

A contemporary signage system for the great outdoors...

LIGHT OAK

DARK OAK

Available in 2 different Timber Effects (above)

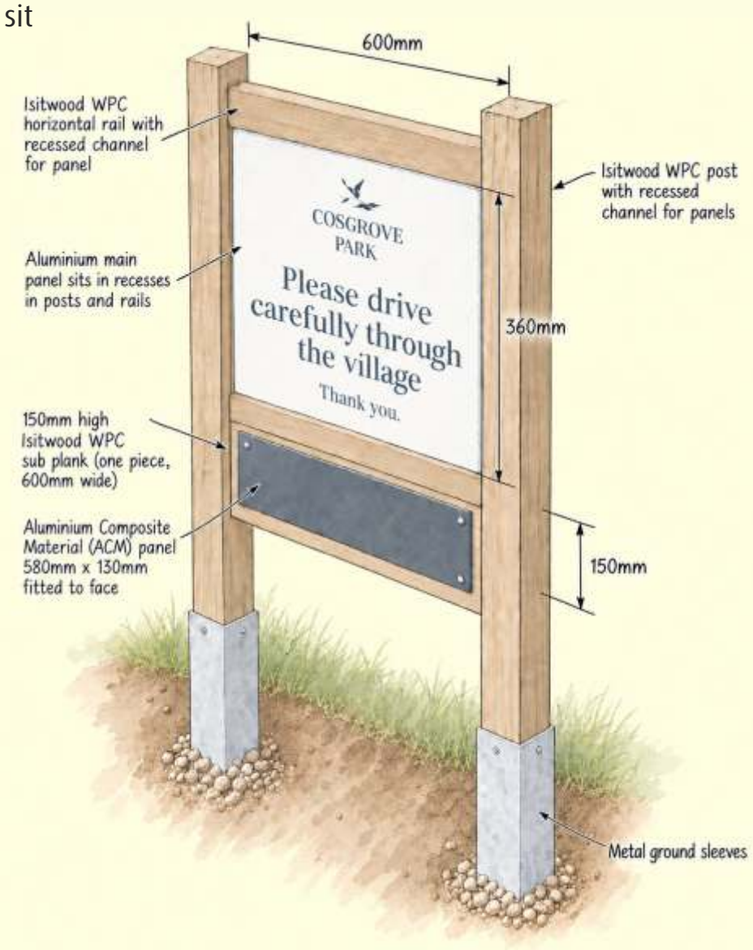

This Ken White Signs isitwood WPC Twin Posted Sign System is well suited to any leisure environment, where signage needs to combine clear communication with an attractive, natural-looking appearance.

The timber-effect WPC frame can sit comfortably within landscaped and outdoor settings, while the interchangeable graphic panels allow the same sign style to be used for identification, information, directional and regulatory messaging.

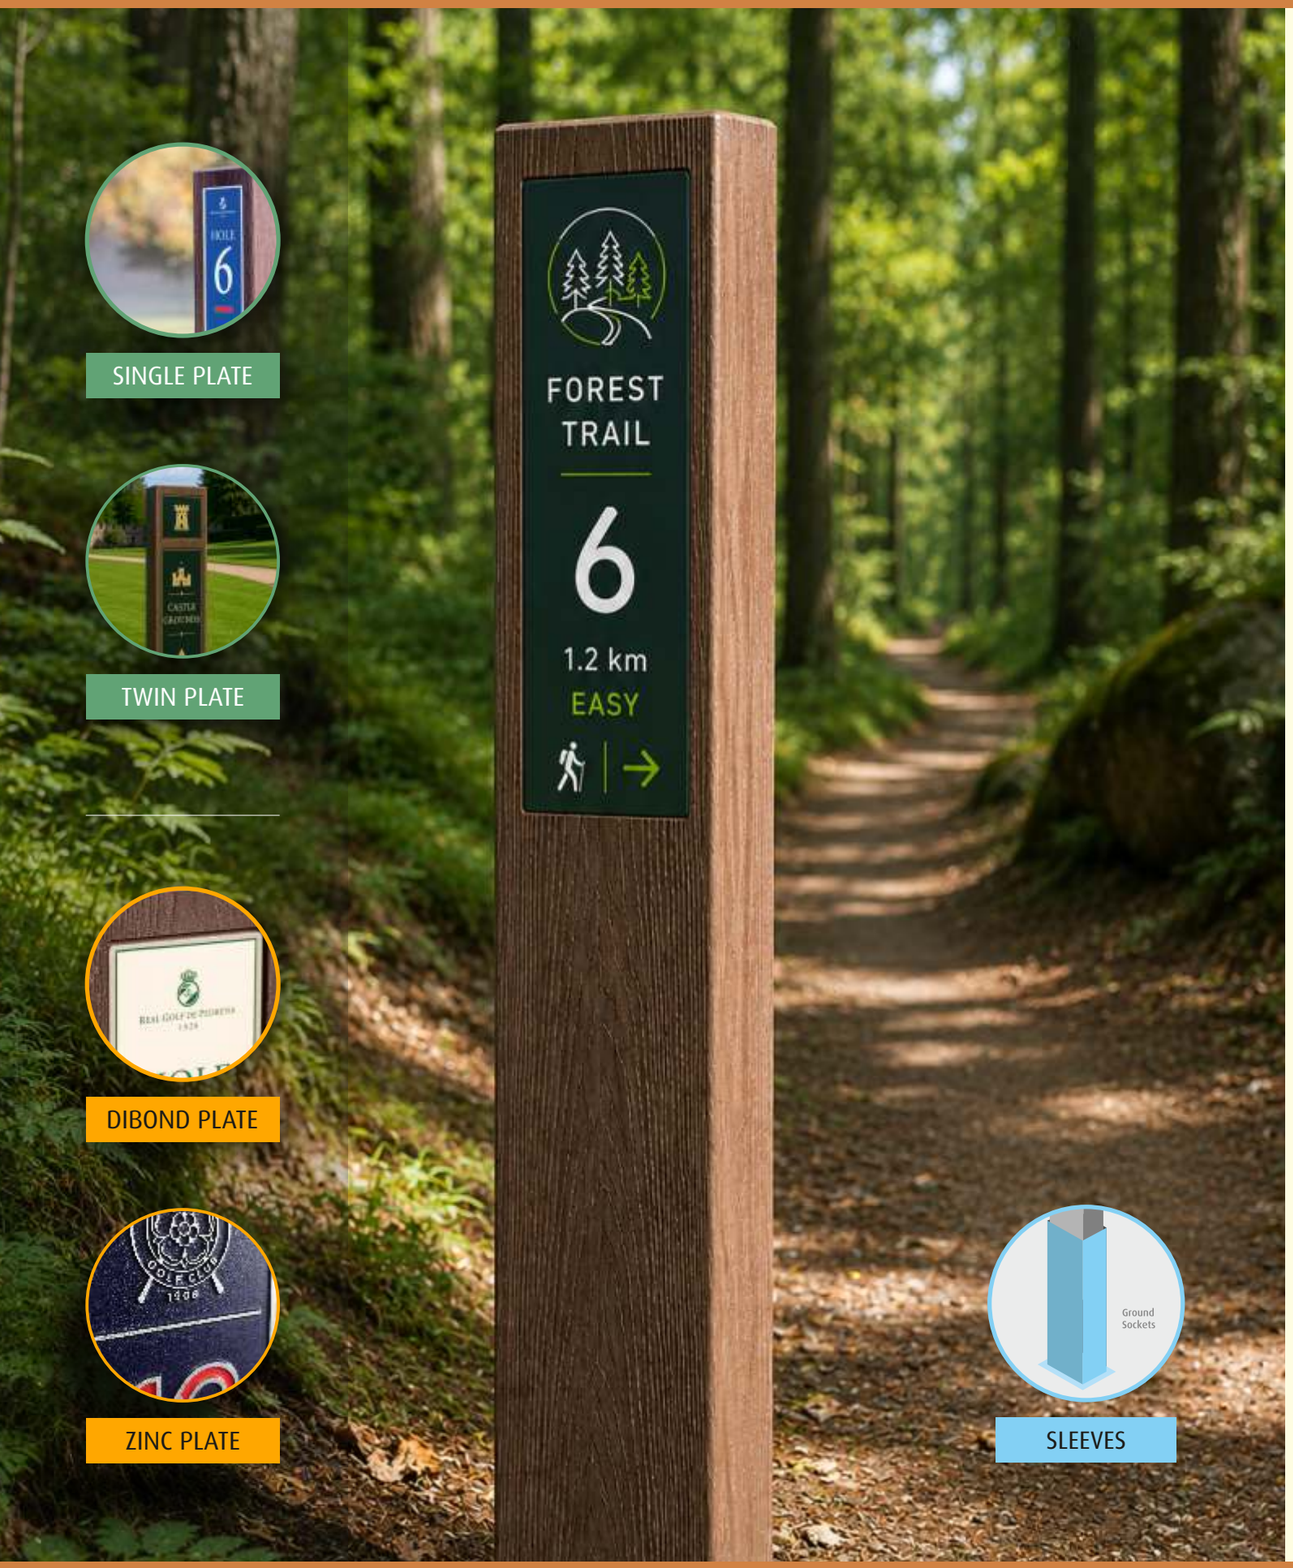

The **isit**wood signage range lends itself to developing a coordinated family of signs throughout a leisure destination.

Peaked top version, with sub panel included

isitwood Slimline Post

Simple wayfinding, naturally designed...

The Ken White Signs isitwood WPC Slimline Single Post is a compact and contemporary wayfinding system designed for leisure destinations where clear visitor information needs to sit comfortably within the surrounding landscape.

Its slender WPC construction provides the natural appearance of timber in a clean, modern format, making it particularly suited to holiday parks, resorts, campsites, woodland trails, country parks, golf courses and other outdoor leisure environments.

A recessed display area is incorporated into the face of the post, providing a neat location for directional graphics, route information, facility identification, pitch or lodge numbers and other visitor messaging.

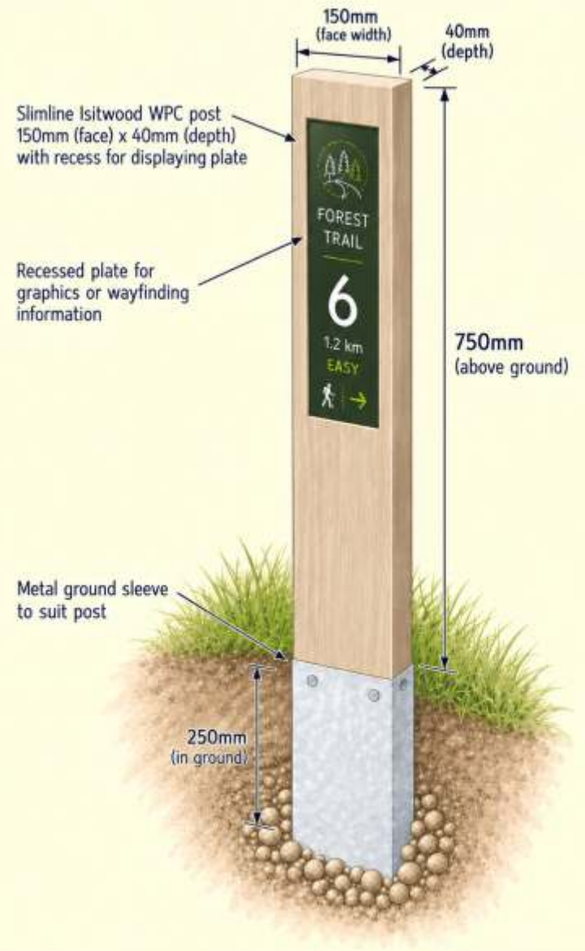

The **isit**wood signage range lends itself to developing a coordinated family of signs throughout a leisure destination.
